ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.*

(54) Title: CRYSTAL OSCILLATORS

(57) Abstract: A crystal-controlled oscillator comprises a crystal that is formed from a material that is suitable for use in the oscillator. However, the thermal expansion characteristic of the material itself enables temperature dependence of the oscillator frequency to be controlled over an operating temperature range for the oscillator. A timing device may incorporate the crystal-controlled oscillator.
